Weighing a mere 13.4kg, this portable beast will have you welding in any pulse mode you like! To make things even better it's equipped with a 2x roll (cogged) all driven wire drive system for smooth and effortless wire feedability and is compatible with Spool Gun, TIG foot control and Dial Remote TIG torch!

So the question is... are you ready to Harness the Power?

BLUEVENOM XF200P³ - HARNESS THE PULSE!

PULSE MIG SELECTIONS

Equipped with 3 Pulse Transfer modes, the XF200P³ is ready to go in hard and give you strong, reliable and neat TIG looking welds! **SINGLE PULSE MIG & DOUBLE PULSE MIG.**

SINGLE & DOUBLE PULSE MIG

Pulse has a growing relevance in the welding industry, as it allows operators to achieve great results with less effort.

When the Pulse function is enabled, the welding current alternates between the base and peak levels according to the set frequency and pulse duration.

PULSE OFFERS THESE WELDING BENEFITS:

- Heat Control
- Arc Stability
- Improved Control Over Weld pool
- Reduced Heat-Affected Zone
- Excellent TIG like looking welds with spaced out ripples
- Reduced Spatter
- Thin plate welding

2x Roll All-Driven Wire Drive system for smoother and effortless feedability.

PULSE STICK AND PULSE LIFT TIG-DC

STICK (MMA) PULSE is designed to allow for; 1) excellent control of heat in low Pulse Mode to help bridge gaps, 2) superb for one-sided root runs in butt welds on plate or pipes, 3) outstanding vertical up heat control to reduce undercut at the fillet weld toes, and 4) perfect for producing flatter fillet welds (more mitre shape) profile when welding in the Horizontal-Overhead position. **TIG PULSE** is Lift TIG-DC Pulse without HF Start. TIG Pulse on this machine is suitable for welding Stainless and Steels, but not for Aluminium.
